DETAILED ACTION

Status of the Claims

Claims 84, 85, 87-92, 94-107, 109 and 110 are pending in the instant application and are the subject of the Office Action below.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

A call to Applicants' representative, Ms. Sintich, was placed on March, 11, 2010, in an attempt to cancel claim 94 so as to proceed to allowance of the application, but an agreement could not be reached. Accordingly, the following action is issued.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 94 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 94 is rejected as being indefinite because the instant claim language expands the scope beyond the claim from which it depends.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re*

Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 84, 85, 87-92, 94-107, 109 and 110 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the claims of U.S. Patent Application Serial No. 10/801,493 and 11/713,091. Although the conflicting claims are not identical, they are not patentably distinct from each other.

The Examiner appreciates Applicants' appendix summarizing the claimed subject matter of related applications. A similar summary would be helpful in each of U.S. Patent Application Serial No. 10/801,493 and 11/713,091.

Conclusions

Claims 84, 85, 87-92, 95-107, 109 and 110 are free of the prior art.

If Applicants should amend the claims, a complete and responsive reply will clearly identify where support can be found in the disclosure for each amendment. Applicants should point to the page and line numbers of the application corresponding to each amendment, and provide any statements that might help to identify support for the claimed invention (*e.g.*, if the amendment is not supported *in ipsiis verbis*, clarification on the record may be helpful). Should
